characterized by reef-building corals. Reefs are formed of colonies of coral polyps held together by calcium carbonate. Most coral reefs are built from stony corals, whose polyps cluster in groups. Coral belongs to the class Anthozoa in the animal phylum Cnidaria, which includes sea anemones and jellyfish. Unlike sea anemones, corals secrete hard carbonate ...

Digital cartography The desire to use computers to replace manual cartographic processes, particularly for the more tedious tasks, was a focus in the 1970's.

Developments in digital cartography often resulted from developments in the larger Computer Aided Design (CAD) field.
