20.1. Bacteriology. Tetanus is caused by the action of tetanus toxin released by Clostridium tetani, a spore-forming gram-positive, motile, anaerobic bacillus. The most common source of environmental exposure to C. tetani spores and bacilli is soil. However, soil is not the only reservoir of the organism.

Naturopathy or naturopathic medicine is a form of alternative medicine that employs an array of pseudoscientific practices branded as "natural", "non-invasive", or promoting "self-healing". The ideology and methods of naturopathy are based on vitalism and folk medicine, rather than evidence-based medicine (EBM). Naturopathic practitioners generally recommend against following modern medical ...

Mammal classification has been through several revisions since Carl Linnaeus initially defined the class, and at present, no classification system is universally accepted. McKenna & Bell (1997) and Wilson & Reader (2005) provide useful recent compendiums. Simpson (1945) provides systematic mammal origins and relationships that had been taught universally until the end of the 20th century.

16.1. Bacteriology. Streptococcus pneumoniae is a gram-positive diplococcus. It is ubiquitous, and many individuals carry the organism asymptomatically in their upper respiratory tract.[] There are over 90 identifiable serotypes of S. pneumoniae. Certain serotypes are more invasive or more associated with antibiotic resistance, and dominant serotypes vary by age and geographical distribution.

Introduction. The appropriate level of access by those on middle and high incomes to welfare and services (popularly known as middle class welfare) has been a controversial issue in political debates in recent years. The introduction of new means tests in the first Rudd Government Budget and the expectation of further means testing in the second has led to renewed debate about
