The petroleum industry has long placed its workers in extreme conditions: in jungles or deserts, or on isolated offshore platforms. But technicians who today operate cranes, drills, and other equipment in remote oil fields may one day operate that same machinery from the safety of their home or office, thanks to advances in artificial intelligence (AI).

The airship is an iconic element of Eberron. I've recently wrapped up a series on Arcane Industry and I've discussed Flight in Eberron in a previous article, but I've received a lot of questions about airships that aren't covered in current material and I want to share my thoughts on them. A few disclaimers: this is not a deep mechanical breakdown of all aspects of airships and airship ...

Oil Pros: Longer working time. Because oil paints stay wet for a lot longer than acrylics, it gives you the flexibility to start a painting and then come back to it the next day and continue straight where you left off. The paint on the palette will still be wet and pliable; the colours on your canvas can still be blended together.
