Successful tuning can only be achieved by using a properly spined arrow shaft. Initially, it is best to start with a shaft recommended by one of Easton ' s Arrow Shaft Selection Charts or by one of Easton ' s computer selection programs, the Arrow Flight Simulator or Shaft Selector ÒPlus.Ó Final verification is achieved during the tuning process.

After cutting your arrows to length, use a Q-tip with 91% isopropyl alcohol to clean the inside of the arrow where the insert or bushing is being installed. This will allow better adhesion for your fletchings and other arrow components. For complete and detailed directions on arrow set up, reference the Easton Tuning Guide.

Paper tuning is one of the most common ways compound archers using mechanical releases determine whether their arrows are leaving their bows in a straight line. (Shooting a compound bow with fingers is more like shooting a recurve bow, and Lancaster Archery Supply recommends bare-shaft tuning in such cases.
