Development economics is a branch of economics which deals with economic aspects of the development process in low income countries. Its focus is not only on methods of promoting economic development, economic growth and structural change but also on improving the potential for the mass of the population, for example through health, education and workplace conditions, whether through public ...

This edition retains the MLA's unique system of documentation, established in the eighth edition of the handbook in 2016. Entries in the list of works cited are created using a template of core elements—facts common to most sources, like author, title, and publication date—that allows writers to cite any type of work.
