Electrical wiring in the United Kingdom is commonly understood to be an electrical installation for operation by end users within domestic, commercial, industrial, and other buildings, and also in special installations and locations, such as marinas or caravan parks. It does not normally cover the transmission or distribution of electricity to them.

The electrician who recently did an EICR for my property found the installation "Unsatisfactory", one of the reasons being that the shower circuit (6mm twin and earth) is overrated with a 40A overcurrent device. In 2017 I had a new 18th edition consumer unit installed and that electrician provided a complete Domestic Electrical Installation Certificate valid for 5 years to the next inspection.
