Our final answer is B, \$(2, 4)\$. Typical Reflection, Rotation, and Translation Problems Again, these types of questions are fairly rare on the ACT, and you will only ever see one question on reflections, rotations, or translations, if indeed you see any at all.

[Reflections, Rotations and Translations: ACT Geometry](#)

So the most rough approximate value that tends to be used is saying that pi, a very rough approximation, is equal to 3.14. So in that case, we could say that this is going to be equal to 64 times 3.14 millimeters squared. And we can get our calculator to figure out what this will be in decimal form. So we have 64 times 3.14, gives us 200.96.
