Review the scientific method. Your students have most likely taken other science courses, but it helps to explain how the scientific method works in physics. Start by listing the steps of the scientific method: observation, asking a question, forming a hypothesis, testing the hypothesis, analyzing the data, and forming a conclusion. Remind your students that a hypothesis attempts to answer the ...

Laws and principles of physics that were developed before about 1900 are considered "classical" physics. Classical physics is the physics of everyday objects—tennis balls and squeaky toys, stoves and ice cubes, magnets and electrical wiring. Classical laws of motion govern the motion of anything large enough to see with the naked eye.

Why Teaching Chemistry and Physics Is So Hard. It's been 20 years since you had high school math or science. You weren't paying attention 20 years ago. You didn't even understand it if you had paid attention. You didn't think you'd ever need to know this stuff. The textbook you found for your student is over your head.
