Valve and cylinder head design is very much influenced by the need to keep the clearance volume to a minimum. A valve design which achieves a small clearance volume uses a conical discharge valve in the centre of the cylinder head, with a ring-shaped suction valve surrounding it (Fig. 4.10). The suction gas enters via passageways within the ...

To allow the maximum amount of outside air to enter the program space, windows are opened and HVAC systems adjusted. (There is no special cleaning or disinfection for heating, ventilation, and air conditioning systems.) School staff are advised to clean and disinfect hands-on materials often and after each use, with materials provided by TPS.
