Figure 11 shows injected mass flow rates for two dwell times from Figure 10—1825 μ s when main injection volume is at a maximum and 2300 μ s when main injection volume is at a minimum. It is apparent from Figure 11 that the nozzle open duration of the main injection varies with dwell time and in fact, explains the oscillating behavior in ...

Utilizing a pressure balanced three-way servo valve in combination with a small piezo-actuator (0.5 cm³ in volume), this injector is capable of injection quantities of less than 1 mm³ /stroke up to rail pressures of 158 MPa (23,000 psi). Because of its low moving mass inside the injector, the dynamics are significantly improved compared to ...

Uses Anesthesia. Sodium thiopental is an ultra-short-acting barbiturate and has been used commonly in the induction phase of general anesthesia.Its use has been largely replaced with that of propofol, but may retain some popularity as an induction agent for rapid-sequence induction and intubation, such as in obstetrics. Following intravenous injection, the drug rapidly reaches the brain and ...

In theory Harley's fuel injection system is still an open-loop system by design. Article courtesy of American Iron Magazine The Harley-Davidson ESPFI system is known as a Speed/Density, Open Loop, Sequential Port Fuel Injection system, that controls both fuel flow, and spark timing. Let's further explain these terms.

If the block is being performed awake or under sedation, skin infiltration with dilute local anaesthetic will be required. A 21 G needle should then be used to infiltrate down to the TP, taking care not to inject at a depth greater than 35 mm. A volume of 2 ml should be sufficient for superficial block at each level. This is controlled by the variable z, which takes the values 1, 0, and -1. (Parameter stepping in LTspice has to be monotonous, so an order like 0, 1, and -1 is not possible.) For z=1, only the voltage injection source Vz is active, for z=0, only the input source Vi (or Ii) is active, and for z=-1, only the current injection source Iz is active.
