The key thing to remember when posing women is that the eye should move easily around the portrait. You guide it along with the curves that you introduce throughout the pose. Subtle curves can be created by bending the wrists, elbows, and knees. You are looking for positions that are harmonious with the model's form.

A self-portrait is a representation of an artist that is drawn, painted, photographed, or sculpted by that artist. Although self-portraits have been made since the earliest times, it is not until the Early Renaissance in the mid-15th century that artists can be frequently identified depicting themselves as either the main subject, or as important characters in their work.

Role of the model. Art models are often paid professionals with skill and experience but are rarely employed full-time, and artists may also rely on friends and family to pose. Paid art models are usually anonymous and unacknowledged subjects of the work. Models are most frequently employed for art classes or by informal groups of artists that gather to share the expense of a model.

As a photographer and an artist, you need to have a game plan - and that plan should involve getting to know the model before the shoot. Not everyone is comfortable taking off their clothes and posing for the camera, so taking a few minutes to build a professional relationship with the model will go a long way in making the shoot more comfortable for you both.
