In the first article of our Mastering Composition series, we discussed the definition of the term “composition”. We also outlined the main goal of composition and talked about why it is such an important part of any work of art. As we dive deeper, it is necessary to define two discrete types of composition with photographic context in mind.

Left-Right Balance. When a photo is perfectly balanced, it means that the left and right halves of the photo draw the eye equally. The left-right division is the only one in your photos which really matters in terms of balance — the top-bottom balance has little effect on how evenly-weighted an image appears.
