People want to buy the cheapest machine. Well the cheapest machine is usually the worst machine. Buy a Mazak. Mazak machines are universally considered to be one of the top MTBs out there, especially for multiaxis lathes. A Haas is not a production machine, it won't be as rigid and potentially won't last as long especially after crashes.

We've only had the machine for a bit, but we've ran it pretty hard. On an average day we drill hundreds of holes with a 1" u-drill thru 1/2" to 3" stainless 304/316/duplex 2205/2507, Hastelloy C276, AL6XN, Monel 400 and many other exotic alloys. I don't think this machine will ever get a chance to run mild steel or aluminum.

G-code (also RS-274) is the most widely used computer numerical control (CNC) programming language. It is used mainly in computer-aided manufacturing to control automated machine tools, and has many variants.. G-code instructions are provided to a machine controller (industrial computer) that tells the motors where to move, how fast to move, and what path to follow.

CNC Programming can be a valuable skill to possess. According to Glass Door, CNC Programmers receive an average salary of \$54,000/year. Compare that to CNC Machine Operators that get \$42,000/year and CNC Machinists who get \$42,000/year. Being a proficient CNC Programmer can boost your income pretty substantially based on those numbers.
