In boating, a fender is a bumper used to absorb the kinetic energy of a boat or vessel berthing against a jetty, quay wall or other vessel. Fenders, used on all types of vessels, from cargo ships to cruise ships, ferries and personal yachts, prevent damage to vessels and berthing structures. To do this, fenders have high energy absorption and low reaction force.

My father (Ron), mother (Karin) and I (Alexander) are doing research in the topic navies and merchant shipping in the period 1500-present. Together we are busy with photographing, drawing and doing research in archives, literature and on the web trying to collect every kind of information and sharing that with others without commercial thoughts just because we are ship lovers and fond of naval ...
