In Mathematics, a time series is a series of data points indexed (or listed or graphed) in time order. Most commonly, a time series is a sequence taken at successive equally spaced points in time. This is a sequence of discrete-time data. Examples of time series are heights of ocean tides, counts of sunspots, and the daily closing value of the Dow Jones Industrial Average.

- The reference list should appear at the end of your paper. Begin the list on a new page.
- The title References should be either left justified or centered on the page.
- The hanging indent for each reference makes the numerical sequence more obvious.
- The entries should appear as one numerical sequence in the order that the material is cited in the text of your assignment.
