DevOps is all about releasing early and often. To do so, you need a strong continuous integration pipeline that tests, packages, and delivers your releases. Building an automated delivery pipeline doesn't have to happen overnight.

Start small, by writing tests for every bit of new code, and iterate from there.

In cryptography, a certificate authority or certification authority (CA) is an entity that issues digital certificates. A digital certificate certifies the ownership of a public key by the named subject of the certificate. This allows others (relying parties) to rely upon signatures or on assertions made about the private key that corresponds to the certified public key.

Finally, taking practice tests, before taking the AP Chemistry exam, is a good idea. You don't have to take multiple practice tests in one session; in fact, this could be done over several sessions. The main goal is to become familiar with the type of questions that the exam might ask, and how such questions can be approached.
