Real estate economics is the application of economic techniques to real estate markets. It tries to describe, explain, and predict patterns of prices, supply, and demand. The closely related field of housing economics is narrower in scope, concentrating on residential real estate markets, while the research on real estate trends focuses on the business and structural changes affecting the industry.

Foreign market entry modes are the ways in which a company can expand its services into a non-domestic market. There are two major types of market entry modes: equity and non-equity. The non-equity modes category includes export and contractual agreements. The equity modes category includes joint ventures and wholly owned subsidiaries. Different entry modes differ in three crucial aspects:
