Step 4: Password isn't the mandatory option; however, it is always a good practice to enter the password and share the workbook to have control over the changes. Protect Sheet vs. Protect Shared Workbook. We can see two types of protection with excel, i.e., "Protect Sheet in Excel" and "Protect Shared Workbook." Don't get confused with these two options; these two aren't the same ...

Unprotect Excel Workbook.  
Once the workbook is  
protected with a password,  
to unprotect, we need to  
remember the exact password  
that we have entered while  
protecting the workbook.  
Follow the below steps to  
unprotect the protected  
workbook in excel. Step 1:  
Open the desired workbook.  
Step 2: While opening, it  
will ask you to enter the  
password.

Step 3: Now we will use file name along with the Workbook function and make or add some text in it. For this, we are selecting the sheet where want to insert the text by using Sheet(1) command. Number 1 inside the bracket is used for a sequence of the sheet, not for the name of the sheet and selecting the Range from cell A1 to A5 as shown below.

The next step is to include an ROI ratio on the front end, as part of your valuation, giving you a range within which to negotiate with sponsors. For example, if your activation is worth \$30,000 and you're asking for \$15,000, the ROI ratio is 2:1. Once you have agreed on a valuation with sponsors, you need to craft a plan to measure ROI.
